

FCC, please work hard to help XM to keep their weather and traffic channels. Can you imagine driving into a very dark tunnel without any lights at all? Well for us truckdrivers not knowing what kind of weather and or traffic is ahead of us is like going in blind. Being able to hit my XM and know whats ahead so I can plan or change my route as needed is truly a blessing. Thank you for your time and have a great day.    GOD BLESS                      NEIL & NINA SPARK
